Amazon Web Services a globally recognized cloud computing service that allows users to host, share and store their applications and data securely in the cloud. Amazon Web Services are much more than just a cloud storage system, offering a wide range of services including Amazon Elastic Compute Cloud (Amazon EC2), Amazon Simple Storage Service (Amazon S3), Amazon Simple Queue Service (Amazon SQS), Amazon SimpleDB and many other services. In addition to storing data in the cloud, AWS also allows users to host, share and store applications via Amazon Elastic Beanstalk. This tutorial will take users through the steps to learn how to use Amazon Web Services.

Create a SimpleDB account: To start using Amazon Web Services, users first need to create an account at Amazon Web Services. They can create a new account or sign in to an existing one. Users who are familiar with an Amazon Web Services account will find that the sign-up and sign-in process is very simple. Users can also link their Amazon Web Services account to other accounts, such as other online banking and personal profiles. Account users can immediately begin creating the Amazon Web Services. Users can take advantage of the Amazon EC2 free plan, which allows up to 15 GB of Amazon Elastic Compute Cloud Storage for 99 months. The free plan allows users to run Amazon Web Services on a free tier-hosted Amazon EC2 instance. At this stage, the free plan is limited to two cluster types, Regional, and US West (N. California). Users can select the cluster type that is closest to their geographic location to avoid paying for more bandwidth and instances than is required. Users can also use the free EC2 plan to run a variety of applications, including simple queue and service applications that Amazon SQS and Amazon Simple Storage Service users can use. These services are designed to load data from external sources, synchronize objects and queue data.

Create an Amazon EC2 account: Next, users must create an Amazon EC2 account. The account will be a required component of all Amazon Web Services accounts. There is no fee to create an Amazon EC2 account. It requires users to provide an
