## About This Game

Inspired by Terry Cavanagh's Super Hexagon, Twixel has you playing as two independent pixels trying to get as far as possible. Crazy hard and addictive, see how long you can last!

### Key Features:

- Ability to control two independent pixels that must avoid all the obstacles coming at them.
- Symmetrical and asymmetrical obstacles pushes players to think on their toes and predict what may be coming.
  - Choose between 2D and 3D graphics.
- 3 difficulty levels, 3 Hyper ones and 1 extreme level with over 100 obstacles to avoid. The longer you play, the better you'll become.
  - Levels bounce to the tune of the music, which is done by the fantastic Robin Ogden.
- Ability to share your scores via Facebook or Twitter, with leaderboards coming later in update.
  - Controller support (in all game except for if you post to Twitter or Facebook)
    - Achievements to be earned throughout all game
    - Trading Cards

This game has a learning curve so possibly that's why for the negative review. Once you get a hold of it then it's a fun game. So much better than Airport Madness.. Just for fans of noir and old school point and click adventures.

. Utterly boring, it is going to take you in a one way train to boredom. I have 12 GB of RAM memory, and it still takes 5~10 seconds to change tabs in the menu, there is not even a map opened. It tries to make you listen to minutes and minutes of boring cheap chat. Do not recommend.. Great game! Glad to see that someone else realized it, too!. This is really a funny little game with a nice depth. After overcoming the first hardships of food supply you will have a vast world to explore. Trading, hatching livestock, plant growing.. Everything for our pleasure.

And the best thing: The defs ask us for opinions and act very quick. Sankyu defs for the pleasure you brought us :Cinamon:. A cute, story-driven puzzle game designed for an all-ages audience. The puzzles themselves are logical and fairly straightforward, rewarding the player with cute animations and scenes from a light romance and mystery story that, while not Shakespeare, are still amusing to watch.

It is short, and it's no Incredible Machine-- if you're looking for something really challenging or based on Rube Goldberg contraptions, you won't find it here. If you want something that will tickle your brain rather than tease it mercilessly, give this one some consideration.

---

GNOG is a really, really, good game. Especially when played with VR.. Having bought Cities: Skylines after After Dark's release, I didn't realize how much of this content wasn't part of the base game: My coastal city industrial economy depends on the use of the Cargo Hub to keep traffic off the roads, the day/night cycle is a core part of the amazing vistas I admire while playing, and the plethora of leisure and tourism related buildings and features are a core part of all my cities.

Looking at its features directly, it is maybe not the most exciting DLC (it certainly would've been underwhelming as a first expansion), but as someone who bought it at a later time, I can appreciate the core features this DLC brings to the game.. This game is not DD (darkest doungeon) tho it does come close. so for all those people saying "if you like DD u might like this" no stfu if u like this u might like that♥♥♥♥♥♥RNG game. this game takes skill is like ♥♥♥♥♥ing birds eye veiw skyrim♥♥♥♥♥on a turn based level. this game will make you ♥♥♥♥♥ing cringe and scream out "why tf am i playing this" then youll continue and play it some god damn more cause you know you had some damn fun. Im telling you rn make a new game play on normal difficulty (hardest one) and iron man mode. IF U DONT HAVE IRON MAN ON ITS LIKE PLAYING X-COM WITH NO IRON MAN. WHATS THE POINT?? youll be clearing some levels and be like wow this is easy i have a sick plan i cant lose! NEXT THING U KNOW U GOT ♥♥♥♥♥♥♥♥ AMBUSHED AND ITS ACTUALLY A CHALLENGE. telling yall str8 up good game if u got some ♥♥♥♥♥ing balls. I was really dissapointed with this one. Was the first Horror style based VR game, and it was hyped up to be really scary. But the whole thing had me dissapointed, should have been something saying to lay down with your head supported for a better experience.. This game is way too overpriced for what it is. I did not like this game very much, the graphics aren't good, gameplay is repetitive. If you are a hardcore worms fan, you can buy it, but I wouldn't recommend it to anyone else.

Thank you for reading & feel free to check out my other reviews.. I'm a fan of the Sherlock Holmes games, but this one let me down on more than one occasion.

- You can see the plot twists coming from a mile away.
- Paradoxally, some of the puzzles are so remote and hard to figure out you can't possibly do it without the included guide.
- The voice acting is awful through and through. More than usual. Very disappointing in a game that relies so much on dialogues.
- The soundtrack is very limited, and apparently almost entirely made out of classical music. That's okay, but it's still limited.
- The mise en scene/cutscene direction is laughably bad in more than one occasion. Also more so than usual in this series.

Only redeeming value is the recreation of a few iconic London landmarks in lovely detail.. This is an enjoyable little game with a novle concept

playing as the archer is fun, but i wish that the camera was zoomed above his head

and the animations arent all that good but im sure they should get better over time

not many people seen this game... yet, otherwise i couldnt find any servers with people playing

besides all of that, this game is fun, its in early access, needs work, but I see's potential in's it's

. 10 spaceships / 10. Ark is one of my favorite game, and i have been looking forward to this since it was announced.

The game does have good aspects but it also have some really negative ones too

#### Pros

You get to be in a VR world with dinosaurs  
You get to hatch and grow said dinosaurs  
It is a fun first time experience

#### Cons

Really short game, i have done almost everything you can do in this game and after that it just isnt that fun anymore.  
There is no one in multiplayer

---

The trailers make the game look alot cooler than it actually is

It is not worth \$40, Wait for a sale

Do not buy the tek edition, i dont even have it but i can already tell it is not worth it

If the game is updated with new things in the future and more replayability is added i will consider playing this game more.
