[Wic Reset Utility Key Gen](#)

The screenshot displays the WicReset v.3.90.10 software interface. The main window shows a printer model 'Epson L120' and a sidebar with navigation tabs: Control, Error codes explanation, Supported models, News, and FAQ. The 'Control' tab is active, showing a tree view with 'Waste counters' selected. Below it are buttons for 'Read waste counters' and 'Reset waste counters'. Other sections include 'Information' with 'Status' and 'Report' buttons, and 'Cleaning' with a 'Head cleaning' button. A 'Refresh detected printers list' button is at the bottom left. A modal window titled 'WicReset' is open, displaying a table of counter statuses:

Counter	Status
Counter	100.35% This counter has reached maximum and will need reset before the printer can be used again.
Counter	66.98% This counter is ok.
Counter	3.80% This counter is ok.

At the bottom of the interface, there is a list of troubleshooting steps:

1. Shutdown the printer and restart your computer.
2. Make sure that your USB cable is of the good quality and try to use another USB port.
3. Disable printer status monitor via printing preferences or task manager.
4. Cancel all printer jobs and disable any applications that can communicate with the printer.
5. Start the printer, wait until initialization sequence is finished, then repeat desired operation.

Please, remember, that fatal error isn't related with waste overflow and it could not be reset by software.

The 'ResetKey.net' logo is visible in the bottom right corner.
